INTRODUCTION

SPECIALIZING IN THE FOLLOWING:

Water filled barriers

Speed ramps

Delineators

Guardrail & accessories (SABS approved)

Traffic Cones

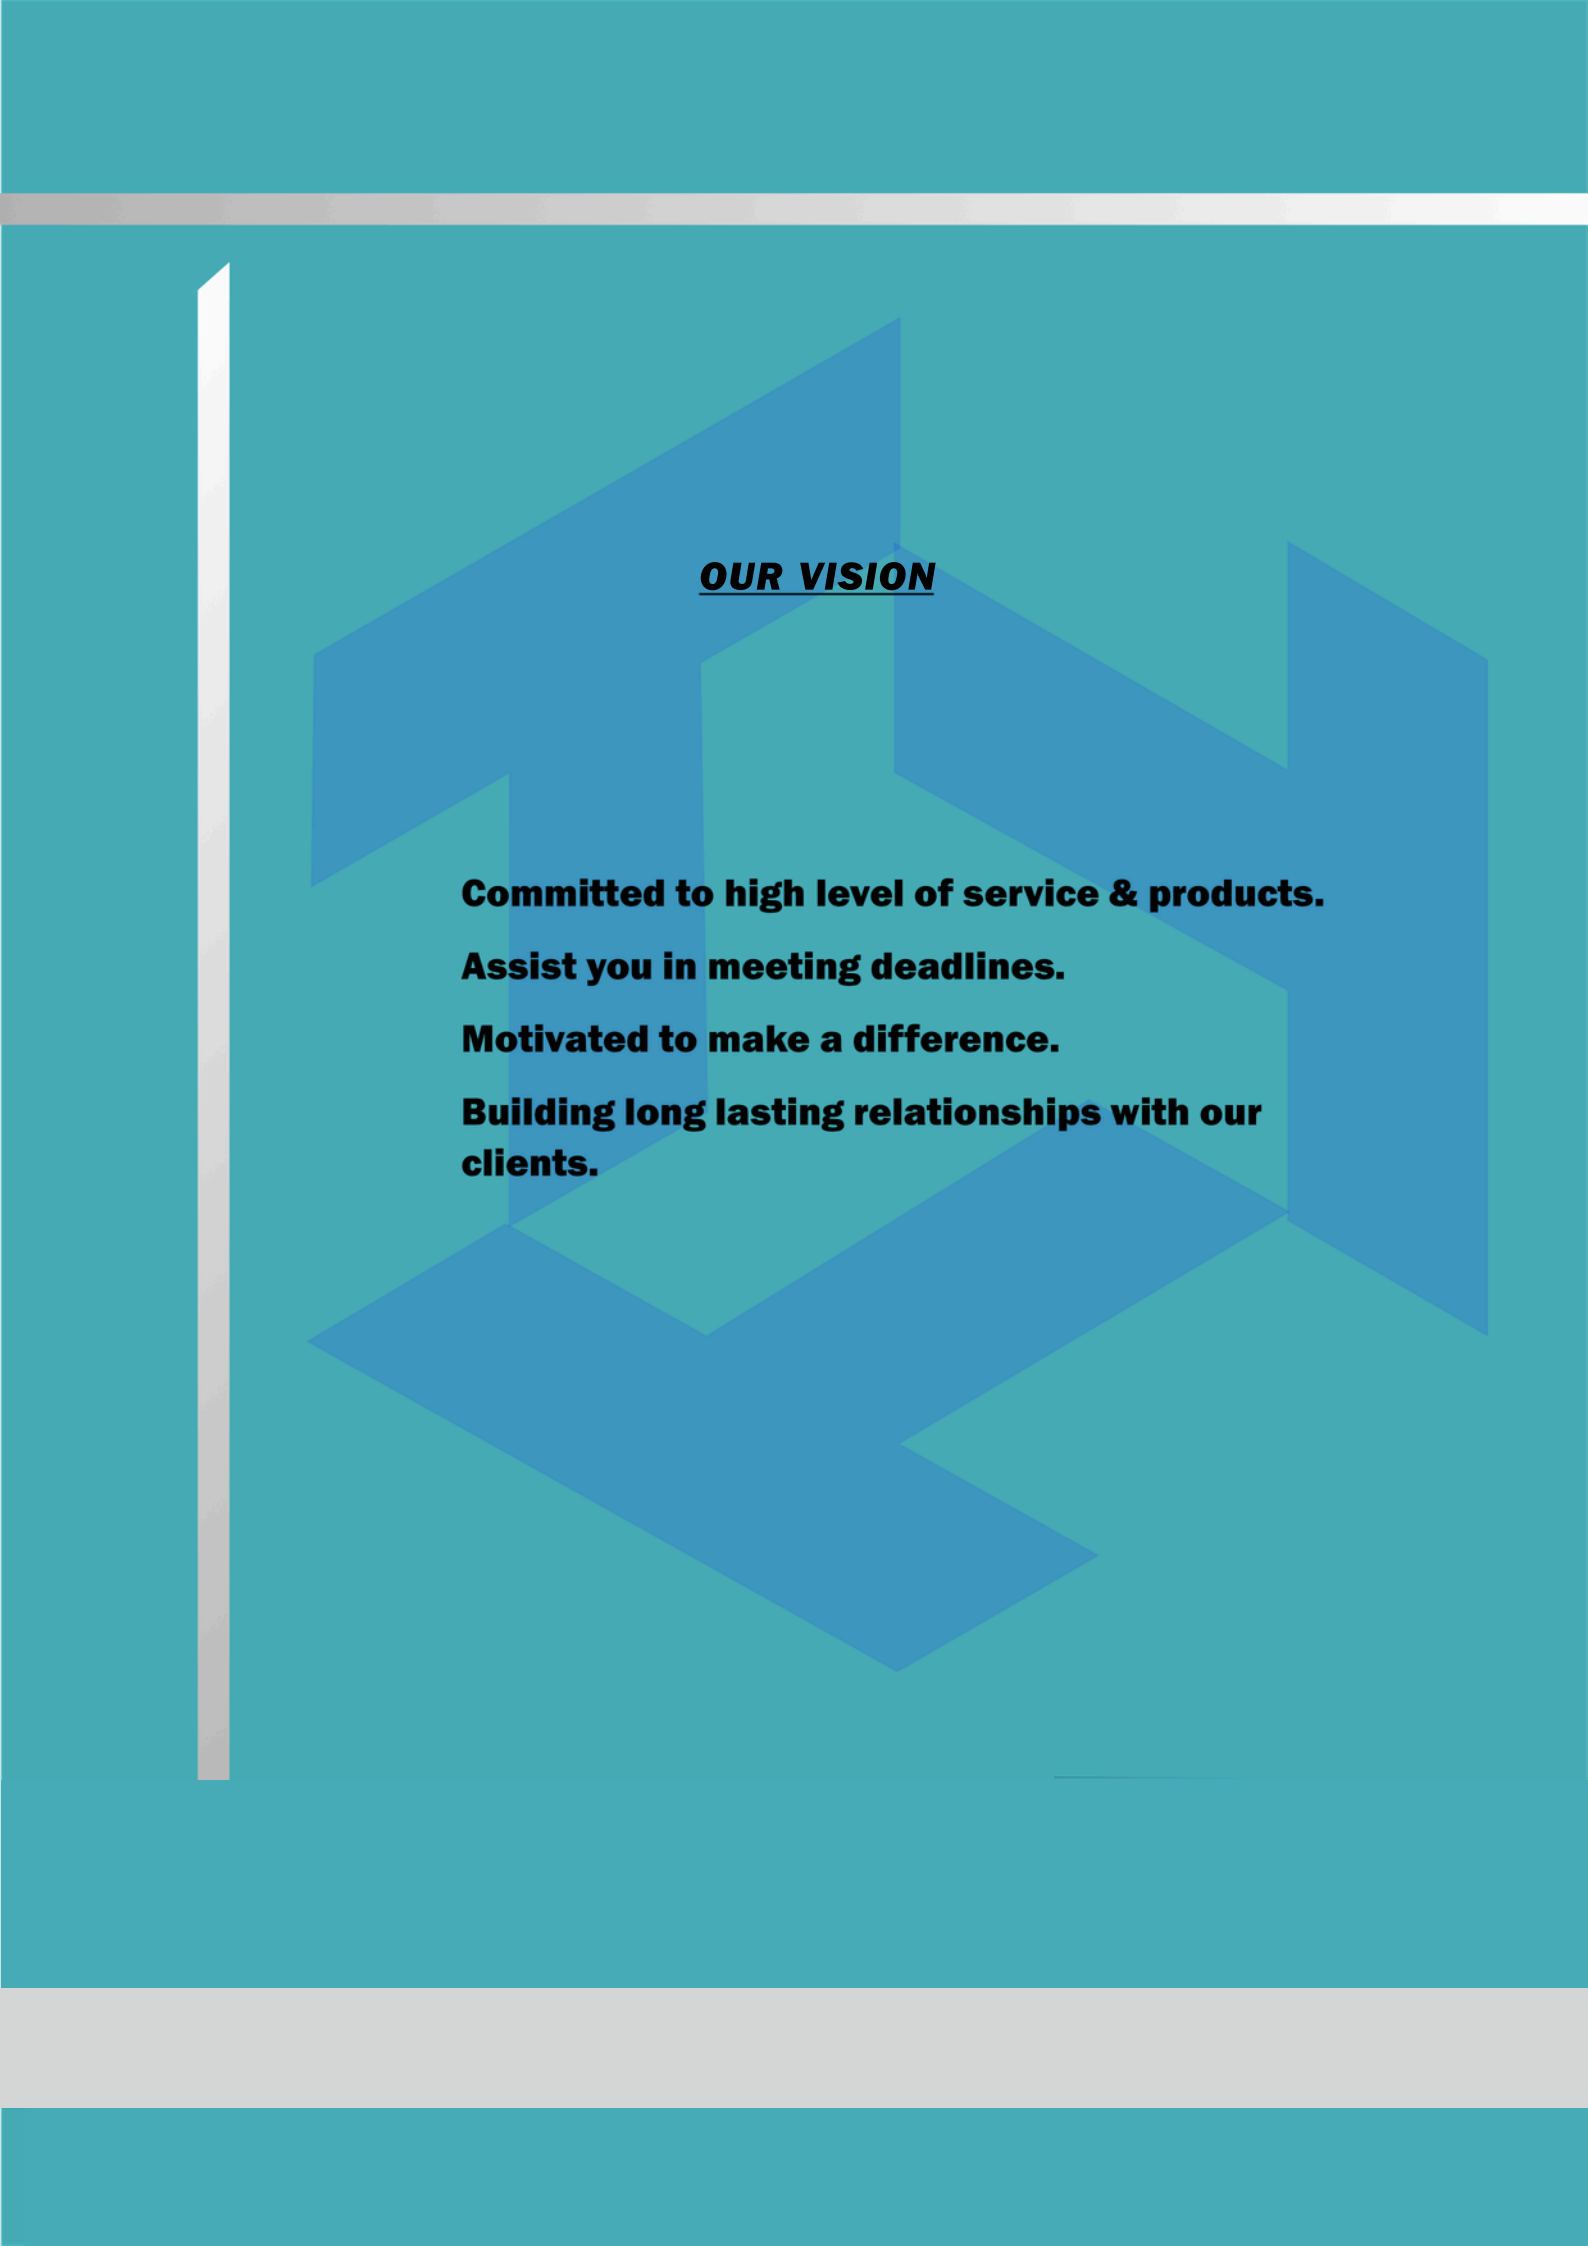

Road studs

Barrier Netting & Fencing

Fire Extinguisher Cabinets

Baboon Proof Bins

Consumables on request

OUR VISION

Committed to high level of service & products.

Assist you in meeting deadlines.

Motivated to make a difference.

Building long lasting relationships with our clients.

JERSEY WATER FILLED BARRIERS

Water Filled Barrier – this popular water filled barrier has been used at road construction and building sites as a vehicle barrier for the past decade. The Barrier is a great alternative to concrete barriers, no cranes or fork-lifts are required.

This mobile road safety barrier provides protection for road workers at work on construction or maintenance sites. The barrier has been proven as an effective method to separate traffic lanes, marking of detours and temporary routes.

Application

Road works

Construction sites

Events – redirection of traffic

Cordon off restricted areas

Safeguard of workers on sites

Features

Placement by manual labour, no forkli s or cranes needed.

2m Long x 1m High

Barriers connect by slight lifting and sliding

Barriers are filled with water or sand

Water can be drained onsite

The 1 meter high barrier cordon off a 2 meter area

Setting up does not require specialized equipment

SPEED RAMPS

Speed Ramps are Idea for residential and commercial applications including multi-level parkades.

Features:

Effective speed reduce

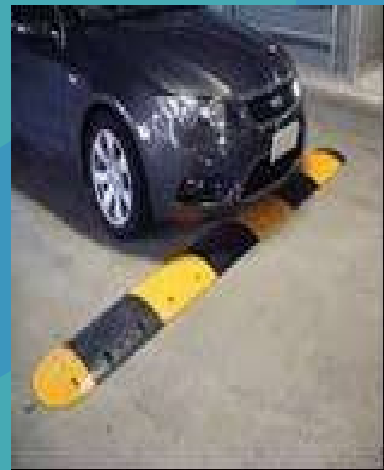

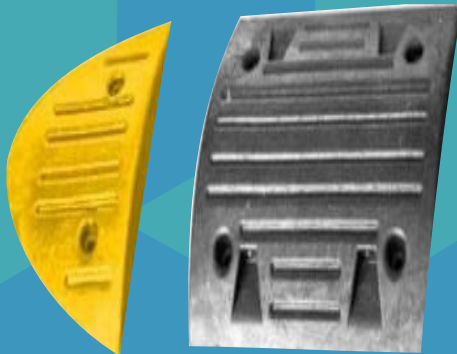

Encourages traffic to reduces speed

High visibility black and yellow ramps with reflector cat eyes for night

**Durable and manufactured to withstand high traffic volumes
low maintenance, tough recycled thermo plastic material**

Not recommended to be installed directly onto asphalt

2 Units per meter.

DELINEATORS

**Reboundable
Interlocking
Dividers
Plastic Bases

TRAFFIC CONES

ROAD STUDS

BARRIER NETTING & FENCING

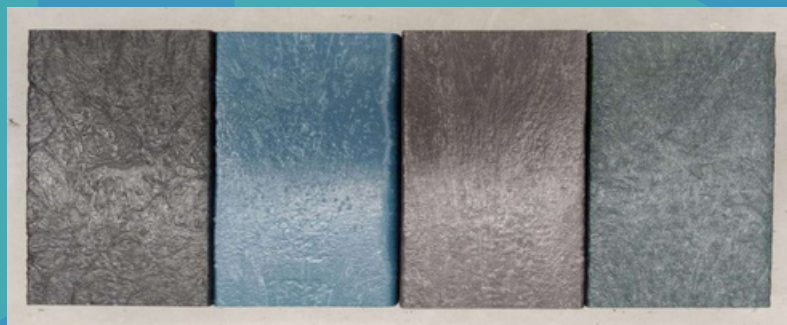

Width – 1m
Length per roll –
50m

UVR stability – 5-8
years

BABOON PROOF BINS

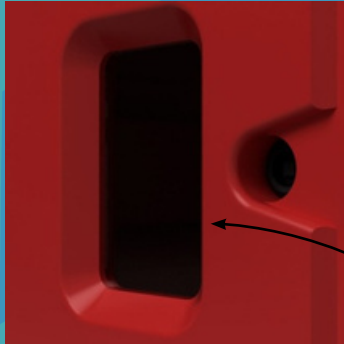

Rotating lid
Lockable
Eco Plastic

Sizes : 460 x 460 x 620mm
540 x 540 x 850mm
680 x 680 x 920mm

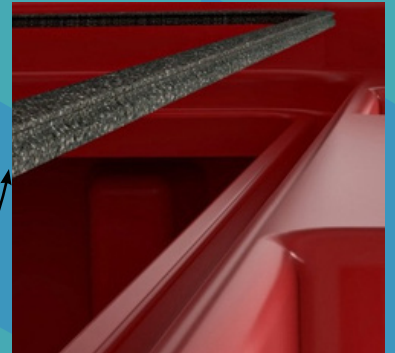

FIRE EXTINGUISHER CABINETS

Moulded-in clear plastic windows

- Fully sealed against the elements.
- Rated for temperatures -60C - +70C.
- UV stabilised.

EPDM rubber door seal

- Prevents water ingress.
- Protect whats inside.
- Easy on-site replacement.

Modular break-glass system

- Same break glass and lock system used throughout range.
- Easy on-site replacement of break glasses and locks.

Fully customisable

- Custom colours available.
- Custom embossed logos and text available.

Material
2 year material and colour
